## OUR SOILS WERE NOT ALWAYS DEFICIENT IN MINERALS

When dinosaurs roamed the earth 70 million years ago, the soil they walked on was rich with minerals. Pre-historic plants contained at least 77 minerals, which became water-soluble as they transmuted through the root system. These luscious, succulent, vibrant, and life-sustaining plants became encapsulated in the Earth's crust in the form of humic shale. Each serving of **Beyond Osteo-fx™** contains a wide spectrum of plant derived minerals leached from ancient humic shale mined from Southern Utah and ranging from A to Z on the minerals list, as well as glucosamine sulfate, MSM, vitamins, and other key nutrients to promote bone health. **Beyond Osteo-fx™** is made from all natural ingredients and has NO starch, wheat, yeast or shellfish. Absolutely no animal derivatives are used in the production or testing of **Beyond Osteo-fx™**. The only sugar in this product is derived from natural vegetable glycerine.
