OUR SOILS WERE NOT ALWAYS DEFICIENT IN MINERALS

When dinosaurs roamed the earth 70 million years ago, the soil they walked on was rich with minerals. Pre-historic plants contained at least 77 minerals, which became water-soluble as they transmuted through the root system. These luscious, succulent, vibrant, and life-sustaining plants became encapsulated in the Earth's crust in the form of humic shale. Each quart of **CAL Toddy™** contains Majestic Earth® Plant Derived Minerals™. These minerals come from a unique source in Southern Utah. They are leached from humic shale with purified water only. The balance of **CAL Toddy™** contains vitamins, major minerals and other beneficial nutrients.
